## Our Mission

Our program will familiarize youth (grades 6-12) with the fashion industry. From understanding construction, to creating garments, to learning about proper fit, this hands-on experience will help participants achieve their goals in fashion.

## Our Goals

Through this program, you will get a chance to attend fun and engaging classes taught by DSU Human Ecology Department faculty in the Textile and Apparel Studies program.

Students will have the opportunity to learn basic construction skills including how to use patterns to create garments. This program will also offer participants life skills training and encourage them to express themselves in a creative and positive environment.

## Are you ready?

Whether you want to begin your journey toward becoming the next big fashion designer, or you just want to perfect your sewing skills, this program can help you get to where you want to be.
