

A wide-angle photograph of a University of Delaware campus. A large, leafy tree stands on the left, casting a shadow over a brick path that leads towards a large, red-brick building with white columns. The sky is clear and blue.

UNIVERSITY OF
DELAWARE

**Summer Opportunities for
Undergraduate Research
and Creative Endeavors
(SOURCE) Program**

The **Summer Opportunities for Undergraduate Research and Creative Endeavors (SOURCE) program** provides summer research opportunities for undergraduates not currently enrolled at the University of Delaware.

Students from underrepresented backgrounds are especially encouraged to apply for the 10-week program on UD's campus. International students eligible for curricular practical training (CPT) and optional practical training (OPT) may be considered as well.

Under the mentorship of UD's cutting-edge faculty, the program offers:

- ▶ **Competitive stipend, housing and round-trip transportation**
- ▶ **Research options in all UD academic disciplines at an R1 research University, a designation held by less than 3% of U.S. colleges.**
- ▶ **Workshops to support research progress and learn about the graduate student experience, including how to prepare for graduate school**
- ▶ **Opportunities to engage with the UD graduate student community and experience the various summer activities in and around Newark**
